

Anglo Printers

PRINTING | SINCE 1983
INNOVATIVE | COST-EFFECTIVE | RESPONSIVE

Anglo Printers is a Litho and Digital Printing operation based in the historic town of Drogheda in Ireland. The business has been driven by a technological revolution over the past few years, and this young, dynamic and focussed Management Team are among the front runners in the Irish Print Industry. The hi-tech print facility is located along the picturesque River Boyne which flows within a stones throw of the factory.

*'We can provide
all your printing
requirements at
competitive prices in
a fast, efficient and
friendly manner.'*

Leaders In Print

The company was founded in 1983 and has grown from a humble organisation to one of the leading players in printing in Ireland. The core business of the firm centres around commercial litho and digital printing, from single colour to full colour on a vast and formidable range of printing presses.

cutting edge
technology...

What we have to offer...

Anglo Printers can provide an extensive service and a prompt delivery nationwide. We have a highly motivated team who value the experience of old, whilst embracing the technology of tomorrow. A raft of investment in new technology and an impressive 30,000 sq. ft. production facility, places us at the forefront of the printing industry in Ireland. Recent purchases of a brand new B1 Komori 5 Colour Press, and the creation of a Digital Hub featuring multiple Xerox production engines, ticks all the boxes for the regular print buyer.

Anglo Printers primarily provide a commercial litho and digital printing service into many major industries including the Horse Racing, Manufacturing, Tourism, Leisure and Service Industries. We are the leading suppliers of printed material to the Horse Racing Industry in Ireland, specialising in the production of Racecards and Event Printing.

Pre-Press Department

Our Pre-Press Department boasts a team of in-house Graphic Designers who provide a comprehensive and obliging service using their extensive knowledge of Quark Xpress, Photoshop, InDesign, Illustrator and Microsoft Suites. Using Screen's Trueflow we handle many file types including EPS, Jpeg and PDF, all of which are colour managed and integrity secured. We use an extensive Apple Mac network with 6 workstations, linked to a Hi-def Colour Scanner. All Digital Assets are managed using an Xserve workgroup Server which is equipped with 4 Hot-Swap Hard Drives and are backed up daily.

This network is linked to output Devices which include a Screen Platerite 8600 B1 CTP System with on-line Processor and Stacker. This CTP system eliminates all elements of manual work in the Pre-press department. Following the clients sign-off we now go straight from computer to plate, resulting in cost saving, consistency of image and guaranteed accuracy of registration on press.

Optimus 2020 Print Management Information System

Our Optimus Management Information System provides up-to-the-minute correspondence on job tracking and production control, using Remote Data Collection Terminals, allowing management to provide real time information on the progress of orders. We can provide you with all your printing requirements at competitive prices in a fast, efficient and friendly manner. So whether it is Stationery, Business Forms, Full Colour Brochures, Promotional Literature or any form of printed material – we guarantee a speedy response and a quality service.

discover *print possibilities...*

The Printing Department boasts a vast and formidable range of printing options. Scheduling of print jobs is performed in response to customer requirements, and can be altered at the touch of a button on our Optimus 2020 Print Management Information System. This system is fully integrated and is the mechanism which drives the whole organisation.

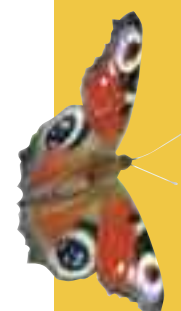

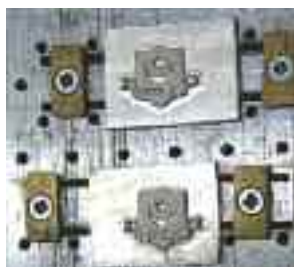

Fulfillment

The arrival of our KAS Mailmaster HS-465 allows us to provide a complete fulfillment service in-house. Up to 9 mail pieces can be collated and inserted into envelopes at speeds of up to 5,000 per hour.

Finishing Department

The Finishing Department has received unprecedented levels of investment in the last few years. This has seen the arrival of an MBO T-700 Folder and more recently an MBO Super K-76 Folder, both of which can achieve incredible production speeds. The options which these machines offer are unlimited, and they have had a huge impact on throughput. Trimming and stitching functions are performed on our Muller Martini 335 with 4 stations, cover feeder and OMG Stacker.

Finishing for the future

This investment programme was topped off with the introduction of a new Schneider Senator E-line 92 fully programmatic guillotine which offers unrivalled performance in high-speed cutting. Staff in the Finishing Department have many years of experience within the print trade and are competent in all bookwork and print finishing matters.

stand out *from the crowd...*

*US Data tells us that there is 22%
return on personalised mailers
whereas just 0.5% of people
respond to mass mailings.*

Direct Mail

We now provide Personalised direct marketing solutions that can increase response rates, maximise your return on investment and, as part of a workflow, will help reinforce brand awareness. We can take our customers to places they have never been before by using XMPie Variable Data Print.

Digital Printing

Digital printing is the production of high quality print products without the use of film and plates. Products are produced directly from disc providing print-on-demand and achieving big cost savings.

Shorter print runs are now cost effective. Digital printing provides unlimited opportunities for personalisation and variable data entry 'on-the-fly'.

Digital Hub

We firmly believe that much of the future of the industry is in Digital Printing. This is why we have created our very own Digital Hub.

*One look at our output will
change your perception of
digital printing forever.*

Digital Equipment

Personalisation and VDP can be achieved in Anglo's Digital Hub by using two new high speed Digital Production Engines, one a Xerox Docucolor AP 5000 which produces stunning digital colour print, and the other a Xerox 4127 which can produce finished booklets and programmes in-line and ready for despatch. Add to this the existing Docucolor 5252 Colour Printer and Docutech 6180 Hi-speed Mono Printer with on-line Bourg Booklet Maker, and you have one of the most advanced Digital Print Facilities in Ireland.

Fast-Track Deliveries

Urgent/unexpected requirements are coded as such and receive instant attention. They are fast tracked through the print department to fulfill the order. In some instances we supply same day and next day deliveries.

premises & processes...*

The Environment

It is our policy to use environmentally friendly products in the manufacturing process whenever possible and we are constantly consulting with our suppliers in relation to same e.g. use of alcohol substitutes.

At the moment we can provide specific environmentally friendly materials based on customer request. All of our waste chemistry is recycled and we only use certified disposal experts. We also recycle all of our waste paper and plastic. All of the paper we use is from Managed Sources and 95% of our supplies are PEFC or FSC certified. This provides reassurance to our clients that their products are verifiable and from legal and sustainable sources.

It is our policy to educate existing clients to understand the Chain of Custody Labeling provided by FSC certification, so that as an industry we can standardise the practice.
